WORK EXPERIENCE

Clare Accounting Group

August 2019-Present

Freelance Web Developer

Remote

Clareaccountinggroup.com

HTML, CSS, Javascript, Bootstrap, Google Maps API, Azure

- Fully responsive, client-facing website implemented using mobile first design principles. Designed the front end from scratch according to the clients needs. Deployed using Microsoft Azure App Service.

Mindtree

November 2019-Present

Microsoft Azure Cloud Developer Support (Nov 2019-Jan 2021)

Remote

- Communicating with software developers and engineers needing assistance with bugs/errors/code configuration/network related issues on Service Bus, Event Hubs, Notification Hubs, and Event Grid
- Troubleshooting includes providing fixes, code review, backend metric analysis, recommending best practices
- 4.9/5 star customer satisfaction rating, two time award winner "Customer Support Engineer of the Month"
- 1+ year full time remote experience

Aflac Applications Support Engineer (Mar 2021-Present)

Remote

- Troubleshoot and resolve bugs, data mismatches, and common issues using Jira, VMWare and internal tools

Venetian Stoneworks

June 2017-May 2019

CAD Programmer

Woodinville, WA

- Rendered 1,000+ drawings, decreased material waste exponentially by strategically positioning layouts
- Upon initial hire, read technical machinery manual cover to cover and discovered previous misuse of machinery. Implemented the fix which instantly rectified misuse and subsequently saved thousands of dollars

EDUCATION

Coding Dojo *Full Stack Web Development Program*

May 2019-September 2019

- 4.0 GPA | Javascript (Angular), C# (ASP.NET Core), Python (Django)

Simpson University *B.A. in Business Administration*

August 2014-April 2017

PERSONAL PROJECTS

Ecomm

React/Redux, Express, Node, MongoDB, CSS Grid, Heroku

Code: github.com/aaronclare3/ecommerce-react-redux

Deployment: <https://desolate-chamber-46400.herokuapp.com/>

- Maintained git workflow using branches for new features with clean commit messages and regular pushes. Backend written using Node/Express and data is stored in a MongoDB cluster.
- Built using functional components and modern hooks such as useState, useEffect, useDispatch, and useSelector. App features include sorting filters, search as you type, and live updating cart totals

Issue Tracker

React/Redux, Express, Node, MongoDB, Bootstrap, CSS Grid

Code: <https://github.com/aaronclare3/issue-tracker>

- Software bug tracking application which includes user login/registration and CRUD functionality using API
- Ability to create an account, create projects, create issues under the projects, comment on the issues etc
